
Model construction
Number of A trials
Non A trials
Pretrained model
A trials – Micro met
finetuning
Fine tuned model with p trials from mm(A)
- p trials from mm(A)
Non A trials
Pretrained model
A trials – alternative method x
finetuning
Fine tuned model with x(A)
A trials – Micro met
finetuning
Sequentially fine tuned model – first with x(A) – second with p trials from mm(A)
- n_x(A) trials from x(A), x ∈ S^alt
- p trials from mm(A)
A trials – alternative method x
Pretrained model
A trials – Micro met
finetuning
Fine tuned model with p trials from mm(A)
- n_x(A) trials from x(A), x ∈ S^alt
- p trials from mm(A)
